This timely program is intended to provide detailed information on the anticipated contracting opportunities for architecture, engineering, construction, and environmental contracts during the transformation to the Superbase.

We are pleased to announce that the program has been expanded to include information on upcoming opportunities at other specific facilities in our region, including: Ft. Drum. Speakers are still being confirmed at press time.

Presentations will include an overview of each mission and explanations of their procurement practices. Speakers will provide detailed forecasts about projects which have not yet been issued for procurement.
