HERO OF THE WEEK
Sgt. Carlos Scarpa
8/3/09 - 8/11/09
Scarpa Scarpa is an Archaeologist in the Environmental Analysis Branch of Planning. He Scarpa volunteered to take over the project to update to the district's history book "Cradle of the Corps". The update, entitled "Continuing the Mission" covers the last 30 years since Cradle was published. The completed, printed issues of the new book were delivered in late August without any projects or delays to his traditional work in support of the civil works program. Fast constant with publishing the book, He Scarpa has "stepped-up" to complete a role not given that was aware that this book receives widespread distribution among current and retired District staff, congressional delegation, sponsor, and Federal depositories throughout the country, including many universities. In this manner, the District will continue to receive the recognition its staff has earned and the community will be reminded of the value this agency consistently provides to the region and the nation.

BLOG
The 24th Engineer Battalion recently completed a mandatory gas mask training in the state of New York.
Sgt. 1st Class Ensigne Rhonda, with the U.S. Army Corps of Engineers' 24th Engineering Battalion, takes notes while looking at generators at the New York Methodist Hospital in Brooklyn, N.Y. He was part of one of six teams made up of two soldiers and one New York City Office of Emergency Management official that were traveling around New York City checking out the power needs of critical facilities as part of an emergency preparedness exercise. They performed similar exercises throughout the tri-state area (NJ, NY, CT) in 2008. The 24th assists with providing emergency temporary power to critical facilities in the event of a natural or man-made disaster, building a database of information through exercises. The idea one can help speed up that process if a disaster strikes.
By Chris Gardner, New York District public affairs.
